To Whom it May Concern:

I am pleased to recommend Slate Construction LLC as a qualified and dependable general contractor. During my tenure at Ramapo college we have contracted Slate Construction to do projects both large and small on both our academic and residential buildings. The work they have done for us always been completed in a timely fashion and done in professional manner. Slate Construction has helped us in instances where other contractors have failed to get to the root cause of the problem. Slate was able to find the problem and prevent it from returning.

We have used Slate Construction for finish work in high profile areas as well as behind the scenes structural and concrete repairs, in either case their attention to detail does not change. Their management team is a pleasure to deal with and everyone from purchasing to accounts payable has remarked at the ease of doing business with them. Slate has been a pleasure to deal and we look forward to continuing our relationship with the company.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Cunningham".
